Applicant Information

Organization Name	Mojave Water Agency *
Tax ID	**952283025**
Proposal Name	2010 Proposition 84 Integrated Water Management Implementation Grant Application *
Proposal Objective	Joshua Basin Water District Recharge Basin and Pipeline Project: 1) Provide additional groundwater recharge, storage, and recovery capacity in the Joshua Basin region; 2) Allow the storage of water during wet hydrologic periods for recovery and use during dry periods, to provide JBWD customers with increased water supply reliability; 3) Reduce the demand for local groundwater; and 4) Enhance water supply reliability. Hi-Desert Water District Wastewater Treatment and Water Reclamation Project: 1) Construct a wastewater collection system to reduce the quantity of leachate from septic tank systems flowing into aquifers used for the District's potable water supply. 2) Treat wastewater to a level such that percolated effluent will not degrade groundwater quality. 3) Provide the core infrastructure for expansion of the collection, treatment and disposal system as needed either to further protect groundwater, or to accommodate growth in the District's service area. 4) Maximize the total water supply available to the District. 5) Minimize any adverse economic and environmental impacts on the community. In addition, specific objectives for the Phase 1a treatment facilities are as follows: 6) Provide sufficient treatment capacity to ensure continuous compliance with anticipated regulatory requirements for an average annual wastewater flow of 1 mgd. 7) Provide for future expansion of the plant to an annual average flow capacity of 6 mgd. Mojave Water Agency Turf Removal Conservation Incentive Program: 1) Incentivize removal of up to six million square feet of turf grass to produce a long-lasting reduction in water demand of 1,012 acre-feet per year. 2) Increase water conservation awareness, community support and participation in water conservation programs. 3) Establish long-term monitoring programs to gage the continued effectiveness of the program, and share this information with other agencies statewide. *

Budget

Other Contribution	$0.00
Local Contribution	$10,095,250.00
Federal Contribution	$3,980,750.00
Inkind Contribution	$70,000.00
Amount Requested	$10,000,000.00 *
Total Project Cost	$24,146,000.00 *

Geographic Information

Latitude *	DD(+/-)	34	MM	41	SS	24
Longitude *	DD(+/-)	117	MM	4	SS	10

Longitude/Latitude Clarification	Approximate center of IRWM Region	Location	Mojave River drainage, east of the San Bernardino Mountains in western San Bernardino County.
County		San Bernardino *	
Ground Water Basin		Copper Mountain Valley,Coyote Lake Valley,El Mirage Valley,Harper Valley,Joshua Tree,Lower Mojave River Valley,Lucerne Valley,Middle Mojave River Valley,Upper Mojave River Valley,Warren Valley	
Hydrologic Region		Colorado River,South Lahontan	
Watershed	The MWA IRWM Region encompasses most of the Mojave River (161) watershed. The southeastern portion of the Region includes portions of the Colorado River hydrologic region, which drain to terminal dry lakes in the Joshua Tree (170) watershed.

Project Information

Project Benefits Information

Project Name: Joshua Basin Water District Recharge Basin and Pipeline

Project Benefit Type	Benefit Type	Measurement	Description

Primary	Conveyance-Water Supply Enhancement	2000	Construct 4.4-mile pipeline to convey water to recharge site
Primary	Water Storage -- Groundwater-Water Supply Enhancement	2000	Recharge imported supplemental supply to halt groundwater overdraft
Primary	Water Storage -- Groundwater-Recharge area developed	2000	Construct 30-acres of recharge ponds
Secondary	Groundwater Management-Monitoring wells installed	1	Develop deep, multi-level monitoring well with USGS
Secondary	Modeling-Groundwater modeling developed or improved	1	Develop basin-wide groundwater model wtih USGS
Tertiary	Flood Protection	30	Incorporate on-site stormwater detention and floodwater management berms into recharge pond design
Tertiary	Trail construction/Improvement	2	Construct two miles of recreation trail connecting local trails and parks near recharge ponds

Budget

Other Contribution	0
Local Contribution	3737000
Federal Contribution	291000
Inkind Contribution	0
Amount Requested	4000000
Total Project Cost	8028000

Section : Applicant Information and Question's Tab

APPLICANT INFORMATION AND QUESTION'S TAB

Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal, including a listing of individual project titles or types. Please note which projects, if any, directly address a critical water supply or water quality issue for a DAC or Native American Tribal communities.

The Mojave Water Agency boundaries encompass over 4,900 square miles of the High Desert in San Bernardino County. The MWA was created in 1960 for the explicit purpose of providing sufficient water within the Agency's jurisdiction. The Mojave Basin area was adjudicated in the 1990s. The Court's ruling noted conditions of severe overdraft, and ordered the Agency to seek and deliver supplemental water. The Mojave Water Agency imports supplemental supply via the State Water Project (SWP). The Warren Valley Basin provides a groundwater supply for the community of Yucca Valley. Conditions of overdraft led to a 1977 adjudication. The Court appointed a Watermaster for the Basin and ordered development of a physical solution. The annual native water supply recharging the region's groundwater aquifers is estimated to average 65,500 acre-feet per year. Current estimates of SWP availability suggest reliable long-term supplies will average 60 percent of entitlement. At this level of reliability, water supply shortages could occur by 2030 or sooner, depending on the success of MWA's conservation programs. Joshua Basin Water District Recharge Basin and Pipeline Project: As part of its long term groundwater management plan, the Joshua Basin Water District (JBWD) will construct a Water Recharge Facility, consisting of a 4.4-mile water delivery pipeline and 30-acre recharge basin site. The water supply pipeline will provide the District access to SWP water from MWA and will relieve current overdraft conditions in the Joshua Tree groundwater basin. The recharge basins would fill by gravity and no pumping equipment is needed. Annual average recharge is anticipated to be approximately 2,000 afy. The facilities are sized to recharge this amount in a six month period. The project includes stormwater management elements, and will provide recreation amenities to the local disadvantaged community area. Hi-Desert Water District Wastewater Treatment and Water Reclamation Project: The Hi-Desert Water District (HDWD) is under a RWQCB order to eliminate discharge to the dispersed septic facilities which are endangering the drinking water supply. Phase 1a of the project will sewer the central portion of the Town of Yucca Valley and convey and treat an average flow of X.X mgd. If the Phase 1a facilities do not adequately protect groundwater quality, or if the RWQCB requires more areas to be sewered, the collection, treatment and disposal facilities will be expanded to collect up to 4 mgd of sewage. The wastewater will be treated to meet Title 22 recycled water standards and discharged to percolation basins to recharge the treated effluent into the Warren Valley groundwater basin. HDWD has purchased 80 acres near Highway 62 and La Contenta Road for the treatment facility. The project includes stormwater management elements protecting a disadvantaged neighborhood, and HDWD is developing an assistance program to help residents pay for connections to the new collection pipelines. Mojave Water Agency Turf Removal Water Conservation Incentive Program: The Turf Replacement Water Conservation Incentive Program (WCIP) will fund a two-year extension to an existing program for the removal of turf grass with partial replacement with drought tolerant and desert adaptive landscaping to reduce per capita consumption and improve water use efficiency. This existing program has proven to be one of the most popular and most effective water conservation programs being offered, with the removal of 3.3 million square feet of turf grass in the MWA service area. Grant funds would be used to fund removal of 6 million square feet of turf by the end of 2012, conserving 1,012 acre-feet every year into the future. The Turf removal program includes consultation with a landscape architect for design of landscapes that retain and percolate stormwater, and includes long-term monitoring to document the program effectiveness.

Q2. PROJECT DIRECTOR

Provide the name and details (including email) of the person responsible for executing the grant agreement for the applicant. Persons that are subcontractors to be paid by the grant cannot be listed as the Project Director.

The Project Director for this application is: Kirby Brill, General Manager Mojave Water Agency 22450 Headquarters Dr. Apple Valley, CA 92307 760/946-7008 kbrill@mojavewater.org

Q3. PROJECT MANAGEMENT

Provide the name and contact information (including email) of the Project Manager from the applicant agency or organization that will be the day-to-day contact on this application.

The Project Manager for this application is: Kathy Cortner, CFO Mojave Water Agency 22450 Headquarters Dr. Apple Valley, CA 92307 760/946-7054 kcortner@mojavewater.org

Q4. APPLICANT INFORMATION

Provide the agency name, address, city, state, and zip code of the applicant submitting the application.

The applicant submitting this application is: Mojave Water Agency 22450 Headquarters Dr. Apple Valley, CA 92307

Q5. ADDITIONAL INFORAMTION

Provide the funding area(s) in which projects are located.

http://www.water.ca.gov/irwm/integregio_fundingarea.cfm

The JBWD and HDWD projects are located within the jurisdiction of the Colorado River Funding Area. The MWA Turf Removal Conservation Incentive Program is located in the Lahontan Funding Area.

Q6. RESPONSIBLE REGIONAL WATER QUALITY CONTROL BOARD(S)

List the name of the Regional Water Quality Control Board (RWQCB) in which your proposal is located. For a region that extends beyond more than one RWQCB boundary, list the name of each Board.
http://www.waterboards.ca.gov/waterboards_map.shtml

The JBWD and HDWD projects are located within the jurisdiction of the Colorado River Regional Water Quality Control Board. The MWA Turf Removal Conservation Incentive Program will be administered within the jurisdiction of the South Lahontan Regional Water Quality Control Board.

Q7. ELIGIBILITY

Proposition 84 requires a minimum funding match of 25% of total project cost unless there is a DAC project included in the proposal. Requirements for DAC funding match reductions are included in Exhibit G of this PSP. If your matching funds are less than 25%, please explain.

Under this proposal a local funding match of 59 percent will be provided.

Q8. ELIGIBILITY

Does the application represent a single application from an IRWM Region approved in the RAP (see Section II.B, Table 1)? If yes, include the name of the IRWM Region. If not, explain.

This application represents a single application from the Mojave Water Agency IRWM Planning Region, which was approved in the 2009 Region Acceptance Process.

Q9. ELIGIBILITY

Is the applicant a local agency or non-profit organization as defined in Appendix B of the Grant Guidelines?

a) ☑ Yes
b) ☐ No

Q10. ELIGIBILITY

and you do not have to answer Q11 and Q12.

Urban water suppliers that will include funding from the proposed grant are: Joshua Basin Water District Hi-Desert Water District

Q11. ELIGIBILITY

Have all of the urban water suppliers, listed in Q10 above, submitted complete 2005 Urban Water Management Plans (UWMP) to DWR? Have those plans been verified as complete by DWR? If not, explain and provide the anticipated date for having a complete UWMP. Will all of the urban water suppliers listed in Q10, along with any additional urban water suppliers that meet the urban water supplier definition threshold for the first time, submit updated 2010 UWMPs, consistent with the 2010 UWMP Guidebook and verified as complete by DWR, before the execution of a grant agreement? If not, explain.

Both the Joshua Basin Water District and the Hi-Desert Water District have submitted complete 2005 Urban Water Management Plans to DWR. Both plans have been verified as complete by DWR. Both the Joshua Basin Water District and the Hi-Desert Water District will submit updated 2010 Urban Water Management Plans to DWR, to be verified by DWR as complete, prior to execution of a grant agreement. No additional water suppliers, including those that might meet the urban water supplier definition threshold for the first time, will receive funding through this grant application.

Q12. ELIGIBILITY

Have any urban water suppliers listed in Q10 recently submitted AB 1420 compliance tables and supporting documentation to DWR for a different grant program within the past three months? If so, please list the urban water supplier and the grant program. An urban water supplier must submit AB 1420 compliance documentation to DWR. If the urban water supplier has not submitted AB 1420 documentation, or that documentation was determined to be incomplete by DWR, the urban water supplier's projects will not be considered eligible for grant funding. Refer to Section IIIB of the Guidelines for additional information.

Both the Joshua Basin Water District and the Hi-Desert Water District have submitted AB 1420 compliance tables and supporting documentation to DWR. Neither district has applied for other DWR grant funds in the past three months.

Q13. ELIGIBILITY

Does the Proposal include any groundwater management or groundwater recharge projects or projects with potential groundwater impacts? If so, provide the name(s) of the project(s) and list the agency(ies) that will implement the project(s).

All three projects include groundwater management or groundwater recharge projects each with potential (beneficial) groundwater impacts. Mojave Water Agency Turf Removal Water Conservation Incentive Program – a water conservation project to conserve local groundwater supplies Joshua Basin Water District Recharge Basin and Pipeline Project – a groundwater recharge project Hi-Desert Water District Wastewater Treatment and Water Reclamation Project – a groundwater quality protection project that will eliminate over 5,500 septic tank systems, and recharge high-quality tertiary-treated effluent.

Q14. ELIGIBILITY

For the agency(ies) listed in Q13, how has the agency complied with CWC §10753 regarding GWMPs, as described in Section III.B of the Grant Guidelines?

The 2004 Mojave Water Agency IRWMP included a fully-integrated Groundwater Management Plan that is in compliance with CWC 10753. In addition, the Mojave Basin area and the Warren Valley Groundwater Basin are adjudicated, and the projects included in this application are in compliance with these adjudications.

Q15. ELIGIBILITY

Does the IRWM region receive water supplied from the Sacramento-San Joaquin Delta? Please answer yes or no. If no, please explain. If yes, please answer Question 16.

Yes. The Mojave Water Agency is a State Water Project contractor and receives water from the Sacramento-San Joaquin Delta.

Q16. ELIGIBILITY

Does the existing IRWM Plan help reduce dependence on the Sacramento-San Joaquin Delta for water supply? Please answer yes or no. If no, please explain. If yes, please complete Attachment 15.

Yes. The existing IRWM Plan helps reduce dependence on the Sacramento-San Joaquin Delta for water supply.

Q17. ELIGIBILITY

If an update to the plan takes place in the near future, will the updated plan continue to reduce dependence on the Sacramento-San Joaquin Delta for water supply? Please answer yes or no. If no, please explain. If yes, please complete Attachment 15.

Yes. Updates to the IRWM Plan will continue to reduce dependence on the Sacramento-San Joaquin Delta for water supply.
